Soil Moisture Monitoring

Appropriate for:

- irrigation management decisions
- Percolation rate identification
- over watering identification
- under watering identification
- rooting depth verification
- water uptake validation
- stress identification
- yearly compliance reporting

Capacitance Sensors
 world leading technology
 reads in volumetric H2O content
 highest resolution available
 long reliable history
 research quality

Dynamic Graphs
 App based
 real-time data
 pan and zoom
 click for ruler
 no extra local software

Budget Lines
 soil moisture made easy
 irrigate to green zone
 Fine Tune irrigations
